

3DA COLOR BALL

3DA Color Ball is a patent pending user friendly wireless control solution accessory for luminaire devices.

Operating on a proprietary wireless standard and using gesture control it allows the consumer to control a wireless product. It's additionally low powered due to the fact that power is consumed only when the ball is moved.

This concept will be of particular interest to companies delivering low power innovative control solutions to the market or companies looking to add a user oriented and playful accessory to their product portfolio.

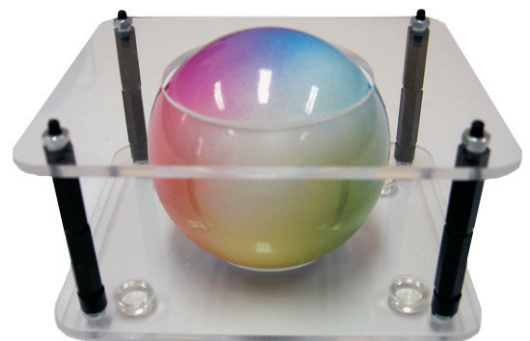

By rotating the Color Ball to the desired color the consumer can realise the desired color in their immediate environment.

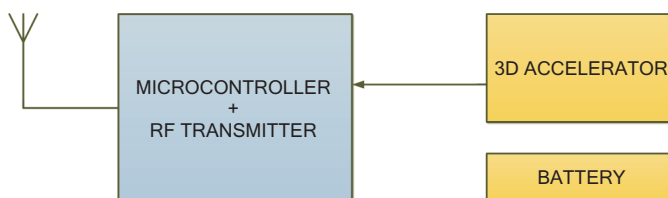

The Color Ball is a consumer friendly gesture control accessory.

3DA COLOR BALL DEMO

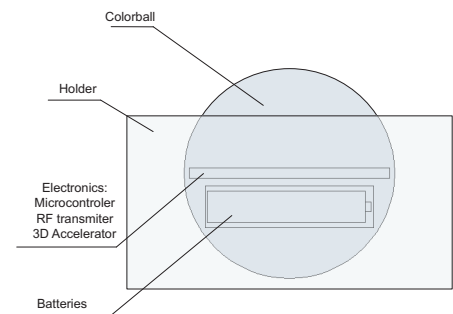

- Turning LC lamp On/Off
- Easier and quicker selection of desired color
